

Agricultural Chemical Users REFRESHER COURSE

Course Description

Refresh your knowledge and skills in chemical use so you can stay up to date with changing work practices. This comprehensive refresher course is specifically designed to bring you thoroughly up to date with all the important changes that have occurred in AgVet chemical use since you obtained your original certification. It offers an extensive overview and detailed instructions on the entire process of applying chemicals and changes to legislative requirements. The course covers the crucial aspects of transporting, handling, and storing chemicals securely, providing you with the knowledge to maintain high safety standards in your work environment.
